

DBX Timesheet App

A step-by-step guide for drivers

This guide walks you through signing in, logging your daily hours, submitting expenses, checking your summary, managing your assigned orders, and uploading your documents in the DBX Timesheet App.

In this guide

1. Signing In
2. Adding the App to Your Home Screen
3. Daily Check-In
4. Submitting an Expense
5. My Summary
6. My Orders
7. Equipment
8. My Documents
9. DBX Docs

1. Signing In

Where do I get my Employee ID and PIN?

You don't create your own account. Management provides every employee their Employee ID and PIN directly — there is no self-registration. If you don't have your ID and PIN yet, ask your dispatcher or manager.

The DBX Timesheet App is a website you open in your phone's browser — there's nothing to download from the App Store or Play Store. Go to:

<https://dbx-timesheets.cargodx.ca>

Step 1

Open your phone's browser (Safari on iPhone, Chrome on Android) and go to dbx-timesheets.cargodx.ca.

Step 2

On the Welcome screen, enter the Employee ID and PIN given to you by management.

Step 3

Tap **Sign In**. Once you've signed in before, the app remembers your info and shows a "Welcome back" message so you can skip straight to signing in next time.

The image shows the DBX Employee Portal Welcome screen. At the top, there is a dark header with the DBX logo on the left and language selection buttons (FR, EN) and a moon icon on the right. Below the header, the word "Welcome" is centered in a large, bold font. Underneath, a subtitle reads "Enter your Employee ID and PIN to access your portal." The main content area contains two input fields: "EMPLOYEE ID" with the text "Manuel" and "PIN" with four dots. A black button with the text "Sign In →" is positioned below the input fields.

Welcome screen — enter Employee ID and PIN

The image shows the DBX Employee Portal Welcome screen for a returning user. The header is identical to the first screen. Below the header, a navigation bar contains four tabs: "1. REGISTRATION", "2. DAILY LOG", "3. EXPENSES", and "4. SUMMARY". A red-bordered notification box at the top contains the text "Welcome back, Manuel! Your info is saved." Below this, the word "Welcome" is centered in a large, bold font, followed by the subtitle "Enter your Employee ID and PIN to access your portal." The main content area contains two input fields: "EMPLOYEE ID" with the text "Manuel" and "PIN" with four dots. A black button with the text "Sign In →" is positioned below the input fields. At the bottom of the main content area, there is a button with a circular arrow icon and the text "Reset Profile". The bottom of the screen features a dark navigation bar with five icons and labels: "Log", "Orders", "Equip.", "My Docs", and "DBX Docs".

Returning user — info saved, ready to Sign In

2. Adding the App to Your Home Screen

You can add the Timesheet App to your phone's home screen so it opens like a regular app, with its own icon — no browser address bar needed. This only takes a minute and you only need to do it once.

On iPhone (Safari)

Step 1

Open **Safari** and go to dbx-timesheets.cargodx.ca.

Step 2

Tap the **Share** icon at the bottom of the screen (the square with an arrow pointing up).

Step 3

Scroll down in the share menu and tap **Add to Home Screen**.

Step 4

Confirm the name (e.g. "DBX Timesheet") and tap **Add** in the top right.

The app icon now appears on your home screen. Tap it any time to open the Timesheet App directly — you'll stay signed in just like before.

On Android (Chrome)

Step 1

Open **Chrome** and go to dbx-timesheets.cargodx.ca.

Step 2

Tap the **three-dot menu** in the top right corner.

Step 3

Tap **Add to Home screen** (on some devices this appears as **Install app**).

Step 4

Confirm the name and tap **Add** (or **Install**).

The app icon is added to your home screen, ready to open with one tap.

3. Daily Check-In

Use the **Daily Log** tab to log your hours and a short note about what you worked on each day.

Not every day looks the same

The toggles you see on this screen depend on the event you select. Some events are tracked **per hour**, while others are tracked using **Working Day / Non-Working Day / Per Diem** buttons instead. These are configured per event by management, so the screen may look a little different depending on which event you're logging time for.

Step 1

Confirm the **Date** is correct, or tap **Previous day** to go back a day.

Step 2

Select the **Event** you're working on from the dropdown (e.g. WEC 2026).

Step 3

If the event is tracked by the day, mark it as a **Working Day** or **Non-Working Day**, and/or tap **Add Per Diem** if it applies. Then answer whether you used **Equipment** that day (Yes/No).

Step 4

If you're switching phones or continuing a session you started elsewhere, use **Restore session from another device** at the top of the screen.

Logging Time for a Per-Hour Event

If the event you select is tracked **per hour** instead of by the day, the screen changes to show **Clock In** and **Clock Out** buttons instead of the Working Day / Non-Working Day toggles.

Step 1

Select the **Event** (e.g. Grand Prix du Canada 2026).

Step 2

Tap **Clock In** when you start work. The app records the current time automatically, shown under **Right Now**.

Step 3

Tap **Clock Out** when you finish for the day. Your Clock In and Clock Out times together make up your hours for that entry.

Step 4

If you forgot to clock in or out at the right moment, use **Manual time** to enter the correct times yourself instead.

The screenshot shows the DBX Timesheet App interface. At the top, there's a header with the DBX logo, language options (FR, EN), and a moon icon. Below the header, there's a navigation bar with four tabs: 1. REGISTRATION, 2. DAILY LOG (selected), 3. EXPENSES, and 4. SUMMARY. The main content area shows a user profile for 'Manuel Deslauriers' with an 'Edit' button. Below this is the 'Daily check-in' section, which includes a note to log hours and a brief note about work. There's a button to 'Restore session from another device'. The 'DATE' field is set to '2026-07-05' with a calendar icon and a 'Previous day' link. The 'EVENT *' dropdown is set to 'Grand Prix du Canada 2026'. Below the event selection, there are two large buttons: 'Clock In' (blue with a green dot) and 'Clock Out' (grey with a red dot). At the bottom, there's a section for 'Right Now — 17:56' and a 'Manual time' option with a pencil icon.

Per-hour event — Clock In / Clock Out

4. Submitting an Expense

Use the **Expenses** tab any time you need to submit a receipt for reimbursement — even on a day you didn't work.

Step 1

Set the **Expense Date**.

Step 2

Select the **Event** and **Expense Type** the expense belongs to.

Step 3

Enter the **Amount** and **Currency**.

Step 4

Write a clear **Description** — the more specific, the faster it gets processed.

Step 5

Attach a photo or PDF of your **Receipt** (max 10 MB), then tap **Submit expense**.

5. My Summary

The **Summary** tab gives you a running total of everything you've submitted for the selected event: total hours, days worked, expenses, and documents. Use the 7-day / 14-day toggle to change the window, and the hours and expenses breakdowns below to review individual entries. You can jump straight back into **Add hours** or **Add an expense** from here.

6. My Orders

The **Orders** tab shows the loads assigned to you, including pickup and delivery details, reference numbers, and any dispatch notes.

Step 1

Review the pickup and delivery addresses, contact names, phone numbers, and any notes (shown in the yellow note boxes).

Step 2

When you're on the road with the load, tap **Mark In Transit**.

Step 3

On arrival, fill in the **Proof of Delivery** section — receiver name, delivery date/time, and an optional note — then tap **Confirm Delivery**.

Step 4

Use **Add a note** any time you need to log something about the order.

7. Equipment

The **Equip.** tab lists company trucks and trailers along with their plate numbers and any documents on file for that unit.

Step 1

Switch between **Trucks** and **Trailers** at the top, or use the search bar to find a specific unit or plate.

Step 2

Tap a unit to see its details and download any attached documents (e.g. registration).

Equipment list — search or browse trucks

Unit detail — plate and downloadable documents

8. My Documents

The **My Docs** tab is where you submit your own official documents. You can update any of these at any time — just choose a new file and resubmit.

Step 1

Tap **Choose file** next to the document you want to upload: Void cheque (required for direct deposit), Driver's licence, or Headshot photo.

Step 2

For anything else — SIN card, passport, work permit, etc. — use **Other document**, type in what it is, then attach the file.

Step 3

Tap **Submit Documents** once everything you need is attached.
